## CONTENTS

This is the repository for SKA engineering data archiver. It contains: HDBPP Viewer, Archiver Database, Tango Archiver

1. HDBPP Viewer:

It is used to visualize the archived data in the historical database.

2. Archiver Database

MariaBD is used as an archiverdb to store the archived engineering data.

3. Tango Archiver

It is a tango device, basically starts archiving the attributes which are already configured by configuration manager.
